INDUSTRIAL CHEMICALS

NOTICE OF POTENTIAL LIABILITY

URGENT LEGAL MATTER - PROMPT REPLY NECESSARY

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

November 6, 1985

Industrial Chemicals.
129 Quidnick Street
Coventry, RI 02816

Re: Davis Liquid Waste Site, Smithfield, Rhode Island ("the Facility")

Dear Sir:

The purpose of this letter is to notify your company of its potential liability with respect to the above-referenced Facility. The United States Environmental Protection Agency (EPA) has spent and is considering spending public funds to undertake investigation and control of a release or threatened release of hazardous substances, pollutants and contaminants at the Facility. As used throughout this letter, the terms "Facility" and "hazardous substance," shall have the meaning stated in Sections 101(9) and 101(14) of CERCLA respectively.

Unless EPA determines that a responsible party will properly perform such actions, EPA will itself perform such actions pursuant to Section 104 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. §9601 et seq. (CERCLA). Under Section 106(a) of CERCLA and other laws, responsible parties may be ordered to implement relief actions deemed necessary by EPA to protect the public health, welfare or environment. Under Section 107(a) of CERCLA and other laws, responsible parties may be liable for all costs incurred by the government in responding to any release or threatened release from the Facility. Such costs may include, but are not limited to, expenditures for investigation, planning, cleanup and enforcement (hereinafter, the "cleanup process"). Responsible parties under Section 107(a) of CERCLA include current and former owners or operators of the Facility as well as persons who arranged for disposal of a hazardous substance at the Facility, or persons who accepted any hazardous substance for transport to the Facility.

Responses by the owner/operator of the Facility to EPA information requests indicates your company was involved in the transportation of hazardous substances to the Facility or has disposed, or arranged for the disposal of hazardous substances at the Facility.

Based on this information EPA has determined that your company is a potentially responsible party, liable on a continuing basis for all response measures deemed necessary by EPA to protect public health, welfare, and the environment as well as for all of the government's enforcement costs incurred in connection with the Facility. EPA encourages your company, as a potentially responsible party, to undertake voluntary cleanup activities which will be overseen by EPA. Activities currently planned by EPA for the cleanup of the Facility include the following:

1. Removal and disposal of drums of liquid and solid wastes that were excavated at the Facility,
2. Designing and implementing a remedy dealing with both on-site and off-site contamination; and
3. Providing any monitoring, operation and maintenance necessary for any on-site and off-site remedial actions once fully implemented.

EPA may in its discretion decide that other cleanup activities, in addition to those enumerated herein, are necessary to protect the public health, welfare or the environment.

If your company volunteers to undertake any activity associated with the cleanup of the Facility, prior written approval by EPA is required.

As a responsible party, your company is required to notify EPA, in writing within twenty (20) calendar days from receipt of this letter, of your willingness to participate in or conduct any of the activities described herein. If EPA does not receive a timely response, EPA will assume that you decline any involvement in the cleanup process. Your response must also indicate the appropriate name, address, and telephone number for further contact with you. If you are already involved in discussions with state or local authorities, engaged in voluntary cleanup action, or involved in a lawsuit regarding this Facility, you should continue such activities as you see fit. This letter is not intended to advise or direct you to restrict or discontinue any such activities; however, you are advised to report the status of those discussions or actions in your response to this letter and also to provide a copy of your response to any other parties involved in those discussions or actions.

EPA has determined that a release of hazardous substances has occurred, and that a substantial threat of further releases of hazardous substances exists, at the Facility. Upon request by you, EPA will provide any additional information on the nature and extent of the release, and/or threatened releases of hazardous substances.

Your response letter and any request for further technical information should be sent to the following person:

Ira Leighton, Chief
United States Environmental Protection Agency
ME/NH/RI Enforcement Section
Waste Management Division
JFK Federal Building HWC-1907
Boston, MA 02203
(617)223-1966

If you have an attorney handling your legal matters, please direct his or her questions to Jamie Katz, Assistant Regional Counsel of the Office of Regional Counsel, EPA Region I at (617)223-0400.

The factual and legal discussions herein are intended solely to provide notice and information, and such discussions are not to be construed as a final agency position on any matter set forth herein. Owing to the serious nature of the environmental problem posed by the Facility, EPA urges that immediate attention and a prompt response be given to this letter.

Sincerely,

Merrill S. Hohman, Director
Waste Management Division
